

WHO WE ARE

TETA is a U.S.-based strategic technology and transformation advisory firm helping organizations operationalize Artificial Intelligence, trusted data, intelligent automation, and modern enterprise capabilities. We work with business and technology leaders to move beyond isolated pilots and fragmented modernization efforts — designing the governance, data foundations, architectures, operating models, and execution strategies required to deploy AI and transformation initiatives responsibly and at enterprise scale.

Our approach bridges **executive strategy and technical execution**, with particular strength in complex and regulated environments.

CORE CAPABILITIES

AI & AI-Native Transformation

- › Enterprise AI strategy & roadmaps
- › Generative & Agentic AI strategy
- › AI-native application strategy
- › Agentic AI orchestration & operations
- › AI use-case discovery & prioritization
- › AI adoption & operating models
- › AI platform & architecture advisory
- › Executive AI readiness workshops

AI & Data Governance

- › Enterprise AI governance
- › Responsible & trustworthy AI
- › AI risk & control frameworks
- › Model lifecycle governance
- › AI regulatory & policy readiness
- › Data governance operating models
- › Metadata & policy management
- › Governance program design & roadmaps

Data Intelligence, Lineage & Integration

- › Enterprise data strategy
- › Data intelligence & cataloging
- › Data lineage & impact analysis
- › Metadata management
- › Data quality & observability
- › Enterprise data integration
- › Data fabric & modern data architectures
- › Data modernization & AI-readiness assessments

Intelligent Automation & Orchestration

- › Business process automation
- › Intelligent workflow transformation
- › AI-powered process redesign
- › API & enterprise integration strategy
- › Hyperautomation
- › Agentic workflow orchestration
- › Human + AI operating models
- › Operational efficiency transformation

Enterprise Transformation Advisory

- › Digital & enterprise transformation strategy
- › Enterprise architecture advisory
- › Technology modernization roadmaps
- › Business capability alignment
- › Operating model transformation
- › Technology portfolio rationalization
- › Executive workshops & strategic advisory
- › Transformation program design

Problems We Help Solve

- › How do we move AI from experimentation into production?
- › How do we govern AI without slowing innovation?
- › Is our enterprise data trustworthy and ready for AI?
- › How should agents, automation, APIs, applications, and people work together?
- › How do we modernize legacy environments without adding complexity?
- › How do we turn technology investment into measurable outcomes?

INDUSTRIES

Financial Services & Banking

Insurance

Healthcare & Life Sciences

Energy & Utilities

Manufacturing

Public Sector

Technology & Professional Services

Our experience spans enterprise environments where governance, security, reliability, regulatory compliance, data integrity, and operational resilience are essential to transformation.

WHY TETA

Strategy + Execution We connect C-suite objectives with the architecture, governance, technology, and operating changes required to deliver them.	AI + Data + Governance AI is not an isolated initiative. We address the trusted data, governance, integration, automation, and operating foundations required to scale it.	Vendor-Agnostic Advisory Our objective is the right capabilities and transformation path for the client — not a predetermined technology solution.	Senior-Led, Enterprise-Proven Every engagement is led by a senior practitioner with 20+ years across enterprise Data, AI, automation, and hybrid cloud programs in regulated industries.

FLAGSHIP ENGAGEMENTS

Flagship Engagement	Typical Outcome
AI Readiness & Transformation Assessment	Current-state assessment, prioritized use cases, target architecture, and execution roadmap
Trusted AI Governance Accelerator	Governance framework, controls, roles, lifecycle model, and implementation roadmap
Enterprise Data Intelligence Accelerator	Data maturity, lineage, governance, and AI-readiness strategy
Agentic Enterprise Blueprint	Agent opportunities, orchestration architecture, governance, and operating model
Automation & Intelligent Operations Assessment	Process opportunities, automation roadmap, and measurable value case
Executive AI Strategy Workshop	Executive alignment, opportunity prioritization, and 90-day action plan

INTERNATIONAL & EXPORT SERVICES

U.S.-Based Expertise. Global Enterprise Impact. TETA is built from inception to serve U.S. and international organizations, with strategic market development across North America, Europe, and Southeast Asia. International engagements include AI and data transformation advisory, AI governance and regulatory readiness (EU AI Act, Singapore Model AI Governance Framework, emerging ASEAN frameworks), enterprise modernization, AI operating-model development, executive workshops and education, and partner-led transformation programs. TETA is developing its international expansion in collaboration with U.S. trade and export-development resources.
